

Huzaifa Mumtaz

Computer Science final semester student with experience in AI Automation (n8n), Web & App Development and DevOps. Skilled in building responsive websites, automation workflows, and mobile applications using modern technologies. Experienced in developing AI chatbot systems, email automation solutions, and interactive web applications using n8n workflows, Flutter, Firebase, HTML, CSS, Bootstrap, JavaScript, React (Basics), PHP, and Laravel. Passionate about software engineering, AI automation, and modern application development.

PROJECTS

AI Chatbot & Automation System (n8n)

- Developed an AI-powered chatbot using n8n automation workflows with a web-based frontend.
- Integrated automated responses, workflow triggers, and API-based communication.
- Designed responsive frontend interfaces using HTML, CSS, Bootstrap, and JavaScript.
- Improved workflow efficiency through automation and real-time data handling.

ZAIFA-AI-Assistant

- Developed an AI-powered email automation assistant using Flutter and n8n.
- Implemented voice and text command functionality for automatic email sending.
- Integrated REST APIs and webhooks for communication between the Flutter app and n8n workflows.
- Built a responsive and user-friendly mobile application interface.
- Automated email processing without requiring users to open an email client manually.
- Utilized voice recognition technology to enhance user interaction and accessibility.
- Managed project version control using Git and GitHub.

Echoes of Isolation – Final Year Project

- Developed a voice-responsive paranormal horror game using Unreal Engine 5.
- Implemented enemy AI, puzzle mechanics, sanity system, and immersive horror gameplay.
- Used C++ and Blueprint Visual Scripting for game development.
- Created a responsive promotional website using HTML, CSS, JavaScript, Bootstrap and n8n.
